

DIEGO MALDONADO VILLANUEVA

INDUSTRIAL AND SYSTEMS ENGINEER

WORK EXPERIENCE

Software Engineer

Analitica Technology, Nov 2022 — Present

Develop new user-facing features using React. Building reusable components and front-end libraries for future use. Collaborating with other team members and stakeholders, including UX designers, product managers, and backend developers, to deliver high-quality applications. Debugging and troubleshooting issues reported by users or other team members.

Systems Engineer

Infosys Technologies, August 2021 — Nov 2022

Project #2 Bank Customer — Release and Change Management, maintain release management policies and procedures. Coordinate with stakeholders to communicate the status of releases and changes. Plan, coordinate, and manage releases of software and infrastructure changes. Monitor and report on the performance of the release management process.

Project #1 Bank Customer — Maintaining Unix-based operating systems and related software, implementing backup and disaster recovery strategies to ensure system uptime. Maintaining documentation of system configurations and processes

System Engineer Trainee

Infosys Technologies, January 2020 — July 2021

Trainee Program, where I receive technical training in programming languages, software development methodologies, data structures, algorithms so consulting team can allocate resources with the appropriate skills and experience.

Financial advisor

BBVA, June 2018 — July 2019

Sell car financial services to potential clients, providing them with detailed information about the products, services, and benefits. Collaborate with the sales team to develop strategies and achieve sales targets.

Enthusiastic and motivated in my technological and academic skills growth. Confident in my analytical abilities to offer solutions in a day-to-day assignments that requires high level of focus.
